QUALITY, SAFE & WEATHERPROOF

Decorative Lighting Company are a Gold Coast-based importer & supplier of event fairy lighting and festoon lighting. We are a unique niche business that specialise in quality, low energy use LED lighting and have over 30 years' experience creating memorable events and everyday occasions. We offer consultation, supply and installation services to support your creative ideas. We supply to many councils, business associations, main street organisations, event companies, private homes and hospitality businesses all over Australia.

COLOUR CHANGE (RGB & RGBW) FAIRY LIGHTING

This unique fairy light system features the most modern and current lighting technology available on the market in 2020. Features include:

- Every LED on a light string can change between solid colour or pre-set functions
- Function/Colour selection via compatible colour controller & remote
- Increased IP weatherproofing rating (IP65)
- Robust rubber cable construction (natural UV resilient)

SOME BENEFITS OF OUR FAIRY LIGHTING THAT MOST OF OUR COMPETITORS CAN'T OFFER:

- ✓ 12 MONTH WARRANTY – We stand by the quality of our product. Deal direct with the importer. Australian based supplier for answering questions, queries and prompt courier delivery.
- ✓ SIMPLE END2END CONNECTIONS – Purchase what you need and using accessories you can create your lighting design.
- ✓ LOW VOLTAGE AND SAFE – 24volt powered lighting is a practical solution for use in public spaces and safe when used outdoors.
- ✓ OUTDOOR DURABILITY AND FLEXIBLE – The system is weatherproof (IP65 & IP44) and designed for permanent outdoor use.

4 KEY CONSIDERATIONS WHEN ORDERING FAIRY LIGHTING:

SIMPLE 'Do It Yourself' OR
ASK US ABOUT AN *Installation Quote*

1. TYPE OF FAIRY LIGHTING APPLICATION

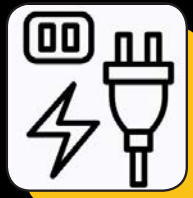

2. HOW MANY METRES DO YOU NEED?

3. CHOOSE YOUR LED COLOUR(S)

4. CHOOSE YOUR POWER SUPPLY

*5. Easy...
Install*

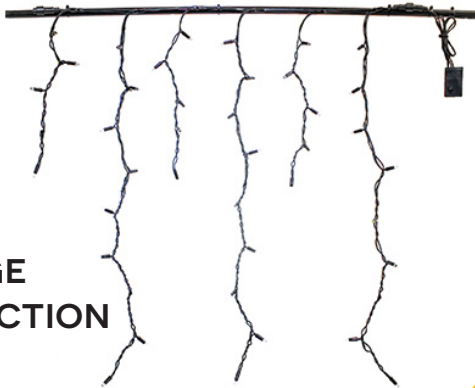

QUALITY, SAFE & WEATHERPROOF

1. TYPES OF LIGHTING APPLICATION

3 METRE STRING LIGHTS

Best suited for... Living Trees / Garden Displays / Lighting Overheads / Man Caves / Shop Window Displays / Bedrooms

VINE SECTIONS

Best suited for... Awnings / Guttering / Shop & Home Facades / Handrails / Balustrades / Living Trees

CURTAIN LIGHTS

Best suited for... Bridal Backdrops / Photo Backdrops / Production/TV / Lighting Overheads

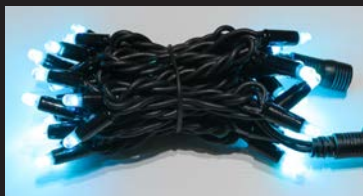

2. HOW MANY METRES CAN I RUN? HOW IS IT COLOUR CONTROLLED?

Our connectable 24 volt Colour Change (RGB & RGBW) Fairy Lighting requires a compatible colour controller to operate the system. A maximum of 14 x 3 metre straight string or 850mm Vine Section can be connected in any one run before the use of a second colour control is required. Solid colour and factory pre-set functions are controlled by the simple remote or push button located on the colour controller.

3 METRE COLOUR CHANGE FAIRY LIGHT STRING	
IP RATING / CABLE TYPE	IP65 / NATURAL RUBBER
QUANTITY OF LED DIODES	35
SPACING BETWEEN LED DIODES	90MM

PRODUCT DESCRIPTION

Stunning fairy light backdrops can be created using our Colour Changeable (RGB & RGBW) Fairy Light strings, and even overheads when hung against the ceiling. Installation is easy, the use of one of our 2 metre curtain belt accessory where every second output is filled as to not exceed the colour controller output; or use shorter belt connectors dependant on the need. For more detail please discuss your requirement with our team.

2 METRE COLOUR CHANGE CURTAIN BELT

IP RATING	IP44

4. POWER SUPPLIES

Our Colour Changeable (RGB & RGBW) Fairy Light Systems require a 24 volt power supply. Decorative Lighting Company supply certified power supplies (SAA & (tick)) that are *outdoor rated (IP67)*. Our experienced team will recommend the appropriate power supply to operate your lighting, as well as provide detailed specifications at your request.

5. MULTI CONTROLLER SETUP

In situations where more than 14 light pieces are required, the use of multiple colour controllers is an easy, practical solution. Simply insert a split connector on the output of the power supply and screw in the required quantity of colour controllers. If needed the use of our screw together blank low volt extension can take power to a starting point, or where lights are to be applied.
