# QUALITY, SAFE & WEATHERPROOF

***Decorative Lighting Company are a Gold Coast-based importer & supplier of event fairy lighting and festoon lighting. We are a unique niche business that specialise in quality, low energy use LED lighting and have over 30 years' experience creating memorable events and everyday occasions. We offer consultation, supply and installation services to support your creative ideas. We supply to many councils, business associations, main street organisations, event companies, private homes and hospitality businesses all over Australia.***

## FAIRY LIGHTING

*The fairy light system uses energy efficient, energy-saving LED technology requiring a 24volt transformer as the power supply. Using the systems unique end2end connections, you only handle one small piece at a time when installing the lights strings.*

### SOME BENEFITS OF OUR FAIRY LIGHTING THAT MOST OF OUR COMPETITORS CAN'T OFFER:

- ✓ 12 MONTH WARRANTY – We stand by the quality of our product. Deal direct with the importer. Australian based supplier for answering questions, queries and prompt courier delivery.
- ✓ SIMPLE END2END CONNECTIONS – Purchase what you need and using accessories you can create your lighting design.
- ✓ LOW VOLTAGE AND SAFE – 24volt powered lighting is a practical solution for use in public spaces and safe when used outdoors.
- ✓ OUTDOOR DURABILITY AND FLEXIBLE – The system is weatherproof (IP65 & IP44) and designed for permanent outdoor use.

## 4. POWER SUPPLIES

Our Fairy Lighting System requires a 24 volt power supply. Decorative Lighting Company supply certified power supplies (transformers) that are *outdoor quality (IP67)*. Our experienced team will recommend the appropriate power supply to operate your lighting, as well as provide detailed specifications at your request.

## 5. DIMMER

With the high light output of our fairy lights, our 24 volt system is one of the only products on the market that is fully dimmable. Our dimmer comes with an RF remote which allows for total control of brightness -/+, plus ON/OFF at the push of a button. The unit has a memory so when the power comes on the unit will automatically adjust to the last brightness setting. This unit, like the entire lighting system screws onto the power supply for immediate plug 'n' play use.
